## Maths Fun – Countdown

Host a game of the popular quiz show, Countdown! As a family create 4 'large' number cards with 25, 50, 75 and 100 on them. Then create digit cards with numbers 1-10 on them, with at least two cards for each number.

Take it in turns to choose a selection of numbers from the pile.

An adult can then give you a target number.

Use addition, subtraction or even multiplication and division to get as close to the target number as you can!
