## Maths Fun – 21 questions

What you need: A set of number cards on post-its (you can choose how high you want to make the numbers go up to!)

Take it in turns to choose a number from the pile without looking at it.  
Place the number on your head.

Ask questions to the other people you are playing with to help you guess what the number is. For example; 'Is my number a multiple of 2?'

You have a limit of 21 questions!
