Maths Fun – Throw and Catch

What you need: A ball

Take it in turns to throw and catch a ball. Each time a successful catch is made you can count up in a particular multiple (eg, you might count in 2's, 5's, 10's, 3's, 4's) If you drop the ball you have to go back to the start.

You can make this more of a competition by setting a time limit and seeing what number you can reach.
